

Self-Service Analytics & BI

Turn data into actionable information

Health plans of all sizes must modernize to stay competitive and prepare for growth. But in many cases, delayed, outdated, and incomplete reports significantly impact the ability to make strategic business decisions. Through high level ideation, design, and implementation, we modernize systems and move data into the hands of the business users who need it.

Our Services

Strategy

- Readiness Assessments
- Requirements
- Product Fit Analysis
- Solution Architecture

Implementation

- Configuration
- Integration
- Testing
- Go-Live

Operations

- Upgrades and New Releases
- Usage Efficiency
- Service Level Agreements (SLA)
- Reporting & Analytics

At SourcEdge, we live and breathe in the world of IT for health plans. We serve as a trusted technology solutions provider, staying on top of the regulatory mandates to protect patient information.

Flexible Engagement

Project Delivery

We lead and implement full lifecycle projects that maximize the value from IT systems, meet regulatory requirements, gain operational efficiencies, and secure competitive advantages.

Consulting

To meet the customized needs of our clients and fill the gaps between staff augmentation and full-implementation, we provide à la carte consulting services for technology-enabled healthcare.

Staff Augmentation

Through our broad and deep healthcare network of talented people, we augment our client's staff with experts who understand the business and technologies our clients rely on every day.
